Benelli M4 / M1014 Combat Shotgun

Benelli Armi / Beretta Holding • US Marine Corps Joint Service Combat Shotgun (12 Gauge ARGO System)

Manufacturer:	Benelli Armi / Beretta Holding	**Category:**	Shotguns
Action Type:	Auto-Regulating Gas-Operated (ARGO) Semi-Automatic	**Era / Service:**	Modern Combat Benchmark (1999–Present)
Calibers:	12 Gauge (2-3/4" & 3" Magnum)	**Covered Models:**	Benelli M4 Tactical (18.5"), M1014 USMC Joint Service Shotgun, M4 Entry (14")

KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: Dual Stainless Gas Piston Carbon Scrape • Rotating Bolt Locking Lug Inspection • Collapsible Stock 3-Position Recoil Tube Upgrade • Carrier Dog Leg Spring Tuning • Full-Length 7-Round Tube Installation

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
ARGO SYSTEM	Auto-Regulating Gas-Operated dual stainless steel short-stroke pistons positioned directly forward of chamber (high pressure, low fouling)
SELF CLEANING	Pistons blow excess high-pressure gas over their own skirts to self-scrape carbon buildup
ROTATING BOLT	Two-lug rotating bolt head derived from combat rifle designs locking directly into barrel extension
EXTREME RELIABILITY	Capable of firing over 25,000 rounds of combat ammunition without part replacement

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Short Stroking on Light Trap / Low-Recoil Loads Gun fails to fully cycle or lock back on empty with light 1-oz target loads under 1150 FPS	• Benelli M4 ARGO is engineered strictly as a combat military weapon for full-power buckshot and slugs. • Brand-new weapon before initial 200-round full-power break-in.	**Gunsmith Action: Run minimum 100 to 200 rounds of full-power 00-buckshot (1300+ FPS) to burnish action tracks and seat recoil spring. Lightly oil bolt carrier rails with high-performance synthetic lube.**
