Beretta A300 Outlander & 1301 Tactical

Beretta • B-LINK Gas-Operated Semi-Automatic Shotguns (12 Gauge)

Manufacturer:	Beretta	**Category:**	Shotguns
Action Type:	B-LINK Gas Piston Semi-Automatic Shotgun	**Era / Service:**	Modern High-Speed Benchmark (2012–Present)
Calibers:	12 Gauge (2-3/4" & 3" Magnum)	**Covered Models:**	Beretta 1301 Tactical (Gen 1 / Gen 2), Beretta A300 Ultima Patrol, Beretta A300 Outlander (Hunting)

KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: B-LINK Gas Piston Elastic Scraper Ring Service • Stock Drop & Cast Shim Set Fitting • Bolt Release Latch Shroud Verification (Gen 1 fix) • Magazine Tube Extension Clamp Torquing • Exhaust Valve Spring Inspection

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
BLINK GAS SYSTEM	Beretta B-LINK system cycles 36% faster than any other semi-auto shotgun (capable of 4 shots in under 1 second)
ELASTIC SCRAPER BAND	Self-cleaning piston features split steel scraper ring that cleans magazine tube with every stroke
BOLT RELEASE LATCH	Gen 2 incorporates redesigned bolt release shroud to prevent accidental double-shell dump on rear latch press
STOCK SHIMS	Included polymer shims adjust drop at heel and left/right cast for tailored shooter eye alignment

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Gen 1 1301 Fatal Shell Dump on Bolt Release Press Accidental rearward press of bolt release button dumps two shells from magazine into receiver, jamming action	• Early Gen 1 bolt release lever lacked shroud; pressing rear of lever acted as magazine dump latch.	**Gunsmith Action: Install Beretta factory Gen 2 one-piece shrouded bolt release latch or Aridus Industries latch shroud to prevent rearward lever travel.**
