Heckler & Koch USP / Mark 23 Series

Heckler & Koch • USP 9, USP 45, USP Compact & US SOCOM Mark 23 (.45 ACP & 9mm)

Manufacturer:	Heckler & Koch	**Category:**	Pistols
Action Type:	Double-Action / Single-Action Combat Pistol	**Era / Service:**	Modern Tactical Tank (1993–Present)
Calibers:	.45 ACP, 9x19mm Parabellum, .40 S&W;	**Covered Models:**	USP 45 Full Size, USP 9mm, USP Compact, USP Tactical, US SOCOM Mark 23 Mod 0

KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: Control Lever Detent Plate Conversions (Var 1–10) • Captive Recoil Buffer Assembly Service • Extractor Claw Inspection • Match Trigger Kit Installation • Barrel O-Ring Replacement

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
RECOIL REDUCTION	Patented captive dual-spring recoil system with high-impact polymer buffer reducing felt recoil by up to 30%
BARREL RIFLING	Cold hammer forged polygonal bore profile with extreme gas velocity and ease of carbon cleaning
MODULAR LOCKWORK	Control lever detent plate allows 10 distinct trigger/safety variants (DA/SA, DAO, cocked & locked)
DURABILITY RECORD	Tested with over 20,000 rounds of +P ammo and squib load clearance testing without slide failure

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Control Lever Detent Plate Jam (Safety Binds Mid-Throw) **Thumb safety lever catches halfway between safe and fire positions**	• Detent plate stamped metal arm distorted from forced manipulation. • Detent slide ball missing or gummed with dried grease.	**Gunsmith Action: Disassemble frame lockwork. Inspect detent plate for flatness on surface plate. Replace detent plate with fresh factory HK variant 1/2 plate and apply synthetic grease.**
