KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: Cocking Indicator Inspection • Charging Support Ear Replacement • Disassembly Safety Interlock Check • Paddle vs Button Mag Catch Service • Extractor Roll Pin Service

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
COCKING INDICATOR	Red dot on rear of firing pin visible through slide backplate aperture when cocked
CHARGING SUPPORTS	Patented polymer wings/ears recessed into rear slide serrations for positive racking
BARREL BORE	Polygonal rifling with cold hammer forged cannon-grade steel barrel (O-ring on tactical models)
TRIGGER PULL WEIGHT	5.0 to 5.4 lbs with distinct single-stage crisp wall and short reset

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Slide Fails to Takedown When Rotating Disassembly Lever **Disassembly lever rotates, but slide refuses to push forward off frame**	• Magazine not removed from frame (disassembly safety interlock active). • Disassembly latch not rotated full 90° clockwise. • Internal trigger bar drop latch not tripped.	**Immediate Action: Ensure magazine is out. Lock slide fully back, ensure latch is full 90° down, pull slide slightly rearward and ease forward smoothly off rails without pulling trigger.**
