Henry Classic & Big Boy Lever Action

Henry Repeating Arms • American-Made Tubular & Side-Gate Lever Rifles (.357 Mag, .44 Mag, .45 Colt, .22 LR)

Manufacturer:	Henry Repeating Arms	**Category:**	Rifles & Carbines
Action Type:	Lever-Action Transfer Bar Repeating Rifle	**Era / Service:**	Modern American Tradition (1996–Present)
Calibers:	.357 Magnum, .44 Magnum, .45 Colt, .22 LR, .30-30 Winchester	**Covered Models:**	Henry Big Boy Brass, Big Boy Steel Side Gate, Golden Boy .22 LR, Henry All-Weather

KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: Transfer Bar Alignment & Safety Check • Dual Loading System (Side-Gate & Magazine Tube) • Receiver Cover Disassembly (Golden Boy) • Lever Latch Spring Adjustment • Ejector Spring Inspection

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
DUAL LOADING SYSTEM	Modern Big Boy models feature BOTH a receiver side-loading gate AND a removable inner brass tube for rapid unloading
SAFETY SYSTEM	Internal transfer bar mechanism (no unsightly crossbolt safety or hammer half-cock required)
GOLDEN BOY CONSTRUCTION	Die-cast alloy receiver with polished brasslite cover sleeve; barrel threaded into inner steel receiver core
SMOOTH ACTION	Factory hand-polished rack-and-pinion / lever linkage renowned for glass-smooth out-of-the-box cycling

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Side Loading Gate Stiff / Pinching Cartridge Rim Cartridges difficult to push into side gate; loading gate leaf spring snaps back aggressively on thumb	• Factory loading gate spring temper has heavy initial preload. • Gate opening edge has sharp stamped burr.	**Gunsmith Action: Disassemble receiver. Remove loading gate screw. Lightly polish the inside ramp of the gate window with 800-grit paper. Hand-stone the spring leaf thickness slightly (0.002"–0.003") to reduce insertion effort while maintaining positive gate closure.**
