Ruger GP100 / SP101 & Super Redhawk

Ruger • Modular Frame Heavy-Duty Double-Action Revolvers (.357 Mag & .44 Mag)

Manufacturer:	Ruger	**Category:**	Revolvers
Action Type:	Double-Action / Single-Action Modular Revolver	**Era / Service:**	Modern Industrial Workhorse (1985–Present)
Calibers:	.357 Magnum, .38 Special, .44 Magnum, .454 Casull	**Covered Models:**	GP100 4.2" (.357 Mag), GP100 Match Champion, SP101 Concealed Carry (.357 Mag), Super Redhawk (.44 Mag / .454 Casull)

KEY ARMORER TASKS & BENCH OPERATIONS

Core Procedures: Trigger Housing Modular Sub-Assembly Removal • Hammer & Trigger Dog Shimming • Wolff Spring Kit Installation • Crane Latch Pivot Servicing • Front Cylinder Lockup Verification

CRITICAL ARMORER TOLERANCES & SPECIFICATIONS

SPECIFICATION / CLEARANCE	ARMORER TOLERANCE & BENCH SPECIFICATION
SOLID FRAME DESIGN	No sideplate; solid investment-cast 4140/stainless frame with sub-assemblies dropping out through bottom of frame
TRIPLE LOCKING CYLINDER	Cylinder locks into frame at front of crane, rear of cylinder, and bottom locking bolt
BARREL CYLINDER GAP	0.004" to 0.007" factory specification
HAMMER STRUT SPRING	Modular coil mainspring on steel strut (no flat leaf springs to break or lose tension)
CYLINDER LATCH MECHANISM	Push-button thumb latch pressed straight into frame to release crane

IMMEDIATE ACTION & MALFUNCTION DIAGNOSTIC MATRIX

MALFUNCTION CONDITION	PROBABLE CAUSES	ARMORER BENCH REMEDY
Stoppage 1: Heavy Stiff Double Action Trigger Stacking **Trigger pull increases dramatically in weight right before hammer release**	• Factory 14-lb heavy mainspring designed for extreme primer ignition. • Rough stamped trigger dog surfaces dragging on hammer cam. • Hammer rubbing against interior frame sidewalls.	**Gunsmith Action: Drop out trigger housing assembly by depressing trigger latch spring plunger. Install 0.002" hammer shims and trigger shims to center parts in frame. Polish trigger dog and sear notch. Install Wolff 10-lb hammer spring and 8-lb trigger return spring.**

CURATED BENCH VIDEO REFERENCES

PROCEDURE TITLE	INSTRUCTOR / CREATOR	TECHNICAL PROCEDURE SUMMARY
Ruger GP100 Complete Disassembly, Shimming & Trigger Job	Brownells Gunsmithing Bench	Teardown of the GP100 trigger group, installing Power Custom trigger shims, replacing mainspring and trigger return spring, and smoothing double action stroke.
